

Animal Adaptations II Pre-Visit Activity

Lion Country Safari Animal Adaptations Jeopardy

Directions: visit www.LionCountrySafari.com to help you to learn about these animals and their adaptations.

Birds in Safari World	Reptiles in Safari World	Mammals in Safari World	Mammals on Safari	Birds on Safari
100	100	100	100	100
My green feathers help to camouflage me in trees of the rainforest.	My green scales help to camouflage me in trees, even though I can grow to 6 feet.	My hooked claws help me to hang upside-down in the rainforest.	My black and white stripe pattern helps to camouflage me in the savannah.	My long bill with an expandable pouch helps me to catch fish.
200	200	200	200	200
My paintbrush-like tongue helps me to drink nectar.	My biting force of 3,000 lbs. per square inch helps me to get food.	My quills help to protect me from predators.	My prehensile tongue helps me to grasp leaves high in the trees.	My height and strong legs help me to survive in my home in Africa.
300	300	300	300	300
My sieve-like beak helps me to filter food in the water.	My prehensile tail helps me to live in trees.	My small size, strong legs, and tail help me to travel quickly through trees in the rainforest.	My long, coarse wool helps me to survive in the Andes Mountains of South America.	My powerful legs help me to run up to 30 mph in my home in South America.
400	400	400	400	400
I am very tall, which helps me to survive in my native India.	I may incubate up to 100 eggs, which helps ensure survival.	My highly developed sense of smell helps me to find food, even underground.	I can go for long periods of time without water and can climb rocky cliffs, which helps me to survive on the Barbary Coast.	My dark powerful wings help me to soar, looking for food to scavenge.
500	500	500	500	500
My nearly bald head helps me to scavenge on the African savannah.	My sandy colored shell helps to camouflage me in the desert.	My throat sac helps my family to hear me, even at great distances.	My long hooves splay widely to help me survive in swampy areas.	My long toes help me to walk on soft mud or floating vegetation.
