

Habitat Vol. III Pre-Visit Activity

1. Choose a specific environment (ex: Valdivian Rainforest) to research.

Answer these questions:

- 1) What changes have occurred in this environment in the past 100 years? The past 50? The past 20?
- 2) List any catastrophic events, such as an earthquake, which has impacted this environment.
- 3) List any climate changes that have occurred in this environment, and why.
- 4) List any human activities which have affected this environment, and how.
- 5) List any non-native species which has been introduced to this environment, and explain the results.

2. Share your results with your class.

Habitat Vol. III Post-Visit Activity

After your visit to Lion Country Safari, consider these questions and discuss them as a group:

1. You would like a new cell phone. How can your choices help to protect our environment?
2. You enjoy drinking soda. Which choices can help to protect our environment?
3. You'd like to get a pet. Which choices can help to protect our environment?
4. You want to get a car. How can your choices help to protect our environment?
5. Your family wants to vacation in another country. How can your choices help to protect our environment?
